

LECTURE 2:

INTRODUCTION TO PROFESSIONAL SKILLS

MY PROFESSIONAL SKILLS JOURNEY

This lecture introduced me to the basic meaning of professional skills. I understood that professional skills are the personal and workplace skills needed to behave, communicate, and work successfully in a professional environment.

As a Software Engineering student, I understood that technical knowledge alone is not enough. I also need communication, teamwork, time management, responsibility, confidence, leadership, and problem-solving skills.

This lesson gave me a clear idea about the skills I need to improve before entering the workplace.

- 
- 1. Student Life**
 - 2. Skill Development**
 - 3. Internship Preparation**
 - 4. Future Workplace**
 - 5. Professional Success**

MY PROFESSIONAL SKILL WHEEL

From this lecture, I learned that professional skills are connected to many areas of personal and career development.

MY PERSONAL ACTION PLAN

After learning this lesson, I understood that I should improve my professional skills step by step.

1. Improve my communication skills by speaking more confidently.
2. Improve teamwork by listening to group members and sharing ideas.
3. Manage my time better when completing assignments and projects.
4. Build confidence for presentations, interviews, and viva.
5. Behave professionally in academic and workplace situations.
