

LECTURE 4:

CRAFTING AN EFFECTIVE CV

This lecture helped me understand the importance of creating a professional CV for internship and job opportunities.

A CV is not only a document with personal details. It is the first professional impression that an employer gets about me.

As a Software Engineering student, I understood that my CV should clearly show my education, technical skills, projects, soft skills, languages, GitHub, LinkedIn, and reference.

This lecture helped me think about how to present myself professionally for a Software Engineering Intern role.

WHAT I IMPROVED IN MY CV

- **Added clear personal details**
- **Included a professional summary**
- **Organised my education details**
- **Highlighted my technical skills**
- **Added my software projects**
- **Included soft skills and languages**
- **Added GitHub and LinkedIn details**
- **Added a professional reference**
- **Improved the CV design and readability**

MOHAMED SHAJITH

SOFTWARE ENGINEERING STUDENT

ABOUT ME

Computer Science and Software Engineering student at SLIIT City Uni. Seeking a Software Engineering Intern role and interested in web development, programming, databases, debugging and teamwork.

EDUCATION

Computer Science and Software Engineering
SLIIT City Uni Campus, Sri Lanka
2024 - 2027 (Ongoing)

GCE Advanced Level - Science Stream
Athugalpura Science Development Academy (ASDA)
2020 - 2023

GCE Ordinary Level
Zahira College - Anuradhapura
2018 - 2019

PROJECT WORK

E-Commerce Website

HTML, CSS, PHP, MySQL

- Designed a shopping website with login, product display and cart features.

Patient Record Management System

Bootstrap, jQuery, Node.js, MongoDB

- Created a CRUD system using REST API and dynamic search.

Dress Shop Login System

HTML, PHP, MySQL

- Built login and registration forms with session validation.

ACTIVITIES

- Public speaking and anchoring experience at school events.
- Debating and drama improved confidence and communication.
- ICT activities, coding practice and technology workshops.

SKILLS

HTML/CSS

PHP/MySQL

JavaScript

Git/GitHub

Programming: PHP, Java, C/C++, OOP

Database: MySQL, MongoDB, DBMS

Web Tools: Bootstrap, jQuery, AJAX, JSON

IDE/Tools: VS Code, XAMPP, IntelliJ

CONTACT

SOFT SKILLS

Communication

Teamwork

Problem solving

Time management

Quick learning

Adaptability

LANGUAGE

• Tamil

• English (Reading)

• Sinhala

WHAT I UNDERSTOOD

I understood that a CV should be clear, honest, simple, and easy to read. I also understood that employers may not spend a long time reading one CV. So, the important information should be presented clearly.

As a Software Engineering student, I should highlight my technical skills and projects because they show my practical knowledge.

HOW I PRACTICALLY APPLIED THIS LESSON

I practically applied this lecture by creating my own professional CV for the Software Engineering Intern mock interview.

I included my education, technical skills, project experience, soft skills, languages, contact details, GitHub, LinkedIn, and reference.

I also tried to match my CV with the internship job role by showing my web development, programming, database, and project experience.
