

LECTURE 7:

DINING ETIQUETTE AND TABLE MANNERS

This lecture focused on dining etiquette and table manners. I learned how to behave properly and respectfully during meals, especially in formal and professional situations.

Dining etiquette is not only about eating food neatly. It also shows discipline, respect, confidence, and professional behaviour.

As a Software Engineering student, I may attend interviews, company events, meetings, networking sessions, or formal gatherings in the future. Therefore, knowing proper dining etiquette is important for my professional life.

WHAT I UNDERSTOOD AND MAIN THINGS I LEARNED

Dining etiquette means following proper manners during meals. It helps a person behave respectfully in front of others.

DO'S

- ✓ Sit properly
- ✓ Use polite language
- ✓ Listen to others
- ✓ Eat neatly
- ✓ Keep the phone away
- ✓ Respect the host and guests

MAIN THINGS I LEARNED

- Proper table manners
- Formal dining behaviour
- Napkin use
- Cutlery use
- Sitting posture
- Polite conversation
- Avoiding phone use
- Respecting others
- Eating neatly
- Professional behaviour

DON'TS

- ✗ Do not talk with food in the mouth
- ✗ Do not use the phone continuously
- ✗ Do not make noise while eating
- ✗ Do not rush while eating
- ✗ Do not behave carelessly at the table

HOW I CAN PRACTICALLY APPLY IT

I can apply dining etiquette during university events, formal meals, interviews, business meetings, networking events, and future workplace gatherings.

If I attend a company event or formal lunch, I can behave properly by dressing neatly, sitting correctly, speaking politely, using table items properly, and respecting others.

This skill will help me create a good impression and show professional behaviour in social and workplace situations.

MY SELF-REFLECTION

Before this lecture, I thought dining etiquette was only about eating neatly.

After this lecture, I understood that dining etiquette is also connected with respect, discipline, confidence, body language, and professional behaviour.

This lesson helped me understand that small behaviours can create a good or bad impression. As a Software Engineering student, I should learn these manners because professional life is not only about technical skills.
