Subject: Application for Intern - Software Engineer

Dear **Hiring Manager**,

I am writing to apply for the **Intern - Software Engineer** position at **Riskconnect Inc.** I am currently following **Computer Science and Software Engineering at SLIIT City Uni**, and I am interested in developing my skills in **software development, web development, databases, and problem solving**.

I have basic knowledge of **HTML, CSS, JavaScript, Bootstrap, PHP, Java, C, C++, MySQL, MongoDB, Git, GitHub, VS Code, and XAMPP**. I have also completed academic projects such as an **E-Commerce Website, Patient Record Management System, and Dress Shop Login System**. These projects helped me improve my **programming, database handling, debugging, and system development** skills.

I believe this internship will be a valuable opportunity for me to learn from experienced software engineers and contribute to real software development tasks. I am a **hardworking, quick-learning, and self-motivated** student with good **teamwork and communication skills**. I am also willing to learn new technologies and improve my professional skills.

Thank you for considering my application. I look forward to the opportunity to discuss my suitability for this internship.

Yours sincerely,

Mohamed Shajith
