About the job

Intern – Software Engineer

Responsibilities

- Assist the engineering team in developing and maintaining enterprise web applications.
- Contribute to development tasks including bug fixes, feature implementations, and improvements under the guidance of senior engineers.
- Support testing, debugging, and troubleshooting of application components.
- Work with backend APIs, frontend UI components, and databases as part of assigned tasks.
- Participate in code reviews, team discussions, and Agile ceremonies.
- Use modern development tools and AI-assisted engineering practices to improve productivity.
- Write clean, scalable code using C#/Typescript programming languages.
- Support the development of AI-driven features by preparing data, testing APIs, and validating outputs.
- Collaborate with senior engineers and architects to explore the use of AI in enhancing user experience and business workflows.
- Stay updated with emerging AI tools and frameworks relevant to the product roadmap.
